

# NUCLEAR BURN

Nuclear Burn is an advanced fat burning and metabolism boosting formula.

Nuclear Burn works by combining key ingredients in their exact clinical doses in a five stage process,

**FAT RELEASE MECHANISM:** Tetradecylthioacetic acid or TTA has been shown to enhance mitochondrial function increasing fat loss.

**METABOLISM BOOSTER:** Green Tea Extract, Niacin, Caffeine and Octodrine are combined to increase metabolic rate burning calories to help put your body in a calorific defecate essential for fat loss.

**THERMOGENIC BOOST:** 7-KETO is added to Nuclear Burn as its three oxygenated metabolites convert from one another to provide a thermogenic effect.

**APPETITE REDUCTION:** Garcinia Cambogia has been proven to suppress appetite by increasing serotonin levels. As your Serotonin levels rise so does your mood, reducing the drive for food cravings.

**OESTROGEN REDUCER:** Diindolymethane has been shown to keep the body oestrogen balanced, preventing it from having too much or too little oestrogen.

## Nutritional Information

Typical Values	Per Serving	Per Capsule
Tetradecylthioacetic Acid	250 mg	125 mg
Garcinia Cambogia	150 mg	75 mg
Octadrine	150 mg	75 mg
